ABOUT ME

I am passionate about Fullstack development and am currently expanding my expertise in React.js through a research project. I possess strong knowledge in HTML, CSS, JavaScript, Firebase, Figma, GitHub, PHP, and SQL/MySQL, Tailwindcss. I have a keen aptitude for logical thinking and a deep love for reading, which continually enhances my professional growth and understanding. My commitment to learning and improving my skills enables me to stay updated with the latest industry trends and technologies.

PROJECTS

Pet Adoption and Health Care Application

present

I'm working with a team of four to apply my first-year trainee knowledge. I'm learning React.js to build user-friendly interfaces and using core PHP for backend development, including creating secure APIs and managing the database. This project is helping me grow in both React.js and PHP while collaborating effectively with my team.

DCKAP Trip Application

In this project, I'm part of a team of four contributors, including myself. We are focused on improving and showcasing our frontend development skills. We've divided the project into different parts, allowing each member to concentrate on a specific area. This approach not only helps us grow individually but also strengthens our teamwork. By combining our efforts, we aim to create a smooth and functional application that reflects the knowledge we've gained over the past six months in frontend development.

Green Tea App

I created a full-stack project from scratch using **HTML, CSS, JavaScript, PHP, and MySQL**.

CERTIFICATES

- Introduction to HTML
- Introduction to JavaScript
- CSS Tutorial
